SUMMARY

Fullstack engineer with 3+ years building and shipping production web software. React, Next.js and TypeScript on the frontend; Node.js, NestJS, MongoDB and Supabase on the backend, including API design, auth and business logic. Built and run MyTreda, an inventory platform used by 80+ businesses, 11 of them paying customers. Cut LMS load times 40% (4.5s to 2.7s) for 500+ daily users and delivered 10+ client projects scoring 98+ on PageSpeed.

EXPERIENCE

Fullstack Developer · Brainzcode (Full-time, Remote) Jun 2025 – Present

- Build and ship web applications and client websites with Next.js, React and TypeScript.
- Integrate third-party APIs, webhooks, authentication services and analytics into client platforms.
- Cut load times 40% through code-splitting, lazy loading and asset optimization.
- Delivered 10+ client projects, all scoring 98+ on PageSpeed.
- Implemented SEO (structured data, meta tags, accessibility), growing organic traffic 25%.
- Set up CI/CD pipelines that reduced deployment time by 60%.

Fullstack Developer · Kinplus Technologies (Contract) Nov 2023 – Mar 2025

- Led fullstack development of an LMS: built the UI, integrated Node.js/Express/MongoDB APIs, and designed an exam engine with timer, auto-save and real-time scoring.
- Reduced page load from 4.5s to 2.7s (40%) for 500+ daily active users; raised Lighthouse from 65 to 92.
- Increased user engagement 30% with gamified dashboards and UX improvements.
- Built course filtering with debounced API calls and optimized database queries.
- Set up a Cypress E2E suite and CI/CD pipelines supporting 2–3 production releases a week.
- Built the company website (React, Hygraph CMS): 98+ PageSpeed, under 1.5s load.

Frontend Developer Intern · Ekiti State Digital Skill Academy Jan 2023 – Jun 2023

- Built responsive web apps with React and Tailwind CSS in an agile team (standups, sprint planning, code reviews).

PROJECTS

MyTreda · Inventory & business management platform (built solo, in production)

- Designed and built the Next.js frontend, NestJS REST API, MongoDB schema, auth, activity tracking and deployment. 80+ businesses (11 paying customers), 1,400+ products, 460+ sales records, 3,000+ activity logs.

ClaimMate · AI insurance claim report generator

- Next.js + Supabase app with an OpenRouter pipeline that checks claims for missing information before drafting. Per-user isolation via Postgres row-level security; PDF/Word export; 95+ Lighthouse, under 2s load.

Tech LinkUp · Event discovery for Nigeria's tech ecosystem

- Supabase backend with real-time filtering, optimized queries and event submission workflows; 169 published events. Debounced search and virtualized lists.

KondoHQ · Real estate SaaS (client work)

- Built the user dashboard, property viewing-to-application flow, market insights page and user/admin settings from Figma in Next.js and TypeScript.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Redux, Zustand, React Query, Framer Motion

Backend & data: Node.js, NestJS, Express, MongoDB, Supabase (Postgres, RLS, auth, real-time), REST APIs, GraphQL

Quality & delivery: Cypress, CI/CD, Core Web Vitals, SEO, accessibility, Git, Agile · **AI:** OpenAI API, OpenRouter

EDUCATION

B.Eng., Electrical and Electronics Engineering · Federal University of Technology, Owerri

2019
